

Lincoln Mead is the IT Director for the Utah State Bar where he has developed the Bar's first website and seen it through several iterations. He has implemented a program to assist members of the Bar in solving technology questions and has helped arrange for technology partnerships for the member benefits program such as online CLE. Mr. Mead also provides practice management service information and seminars for attorneys and paralegals, has created interactive communications tools for Bar sections, and worked with the courts and state offices to help get technology tools, services, and information to members of the Utah State Bar. Along with his duties as the IT director he is currently working on the expansion of online member services, and assisting in the promotion and support of the e.filing account management system for the Utah Courts.
